

Customer Flow System

Fully integrated people counting solution

COVID-19 provides challenges which we have a solution for!

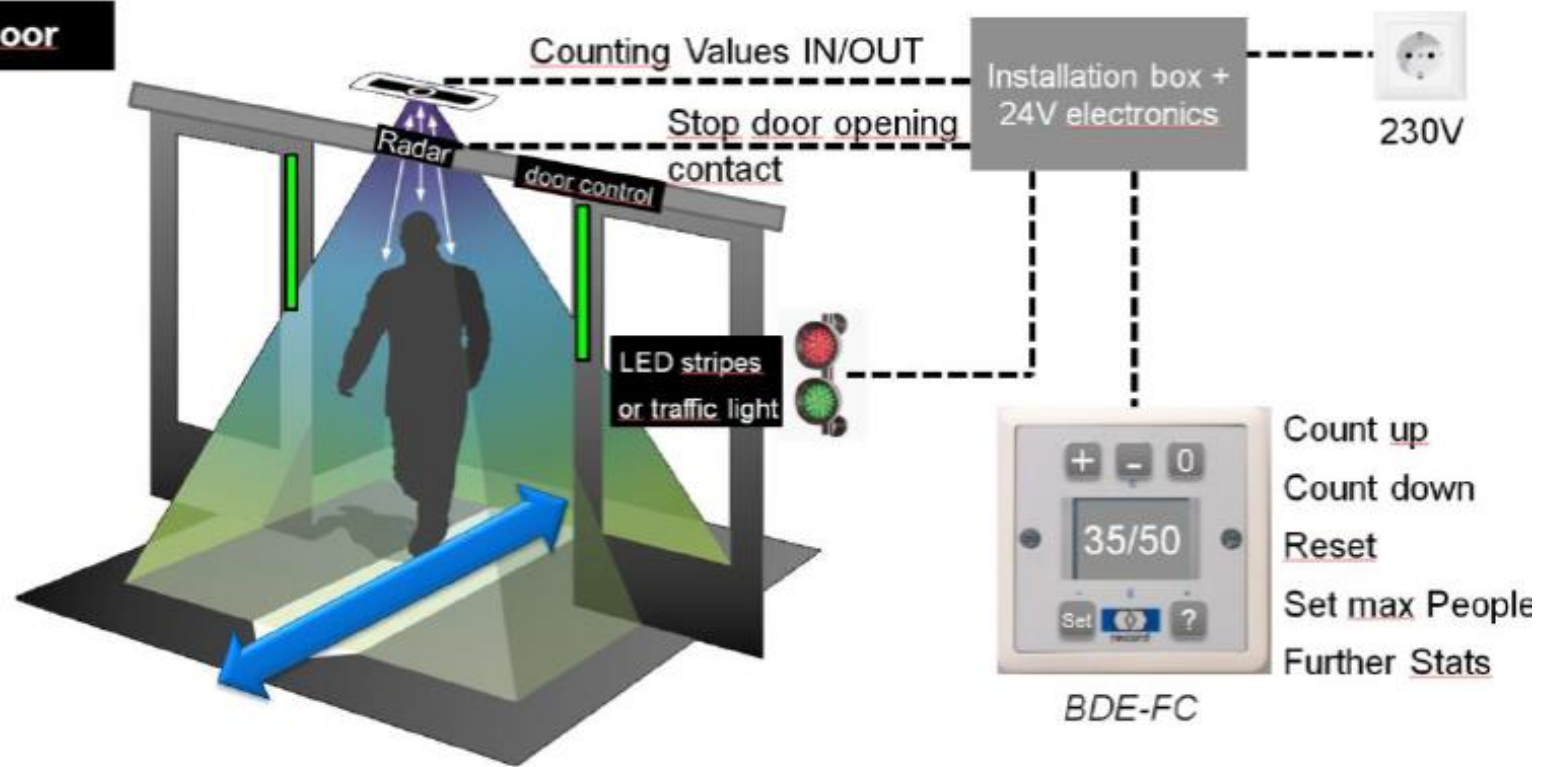

- In the UK, many shops and banks remain open, or will be opened again soon, but with social distancing restrictions.
- Key to this in practice, is limiting the number of people in the store at any one time.
- Today, most companies are achieving this manually by positioning staff outside the store to control entry. – This is expensive in staff costs – It is difficult to cover breaks, lunch, and late hours – It can be impossible for these staff to socially distance and effectively control entry
- We have an automatic solution that integrates with the door and controls the number of people that can enter

FlowControl – system overview – one Entry/Exit door

Entry & Exit door

Features:

- Standalone building occupancy control system with 99% accuracy – Automatic monitoring of actual and maximum allowed people count – Counting value can be changed easily via buttons (+ / - / reset)
- 1 to 4 entrances can be equipped with sensors and LED “Traffic Light” strips to guide customers
- Automatic deactivation of the entrance door when the maximum people count limit is reached – Entrance door remains closed until the people count falls under the set limit with people leaving – Allows the store manager to easily set and control a maximum number in the store or building – Escape routes and building safety is not affected
- Installation takes only a few hours
- System integrates with the existing building doors and can be disabled for times when it is not needed

Financial Pay-Back:

- Minimum cost to manually control entrance door: – 40 hours per week at £10 per hour = £400 per week – Plus, cover for breaks, lunch and any out of hours opening and personnel overhead costs – Minimum of £1,600 to £2,000 per month
- Social distancing restrictions likely to be in place in UK for 12-18 months – with an estimated cost of £28,500.00 over 18 months Plus additional PPE Vs Flow System that would pay for itself within months
